2. Definition of a trading bonus: A trading bonus is an added value to your deposit in your live account and it provides you with more funds to use when you are trading. Trading bonuses come in many forms; there are consistent deposit matches which means that your account will be given an added value when you deposit funds over and over again; and it also comes in the form of a one-time added value on your first deposit. The Company offers these bonus funds. When you fund your account, the Company matches your first real money deposit by a certain amount of percentage in accordance to your first deposit.

3. Warning: A trading bonus gives you great value and extra trading leverage. With all of the above being mentioned; when you trade with bonus leverage you need to be cautious. It is truly appealing, but there is a downside. You may close higher trades and make more money initially (or in the long run), but you can also lose a lot more money.
